

# CONCRETE GIRL

Mike Owen, a contractor from Ohio, is building a large project in northwest Pennsylvania. A beautiful engineer, Ann Lane, manages Shaffer, the company supplying concrete for the project.

When Mike becomes interested in more than a business relationship with his concrete supplier, he finds he has competition from a rival contractor, who simply wants Ann dead.

Ann Lane understands that when evil strikes, you'll only get a moment to save your life. It's best to have the appropriate tool at hand.

Against a backdrop of a missing college girl, fraudulent material substitution, and death threats, Ann and Mike confront enemies who consider rape and murder as additional techniques for improving profits.

---

*When love and  
ambitions conflict,  
who should yield?*
